Axpo and Brembo sign 10-year cPPA for the supply of green energy

Axpo Polska and the global leader in braking solutions Brembo have signed a long-term agreement to power the company's factories in Poland, it was announced today. Under the ten-year PPA, Axpo will supply 1 TWh of green energy from its own portfolio.

Axpo Polska, a subsidiary of Swiss energy group Axpo, has finalised a corporate PPA (cPPA) with Brembo, a global leader in the design and manufacturing of high-performance braking solutions for leading car, motorcycle and commercial vehicle makers. Axpo will provide a total of 1 TWh of green electricity to Brembo's factories in Poland. The cooperation between Axpo and Brembo Poland has been agreed for ten years and includes the sale of Guarantees of Origin confirming generation of energy from renewable sources.

Axpo Polska Head of Origination and Board Member Mateusz Marczewski said: "Axpo's long-standing cooperation with renewable energy producers allowed us to offer Brembo electricity from our portfolio over such a long period of time. It makes me pleased that our solution has been able to meet their needs. It is a promising beginning to our cooperation in Poland."

Each 4th windmill and almost every 10th solar panel in Poland produces energy offtaken by Axpo

Axpo is leading the market in sustainable solutions. The PPAs and cPPAs concluded with the Polish company support farms that last year were responsible for generating more than 25% of the country's total energy production from wind and nearly 8% from solar. By the end of these agreements, Axpo Polska still has more than 18 TWh of energy from RES installations contracted.

Axpo has been present in the Polish market for over 20 years, where the company has become one of the largest independent energy sellers and offtakers of energy produced from renewable sources. Axpo Polska provides services to more than 35,000 companies, implements large-scale photovoltaic projects and develops energy storage facilities as well as biogas power plants.

About Axpo

Axpo is driven by a single purpose – to enable a sustainable future through innovative energy solutions. Axpo is Switzerland's largest energy producer and an international leader in energy trading and the marketing of solar and wind power. Axpo combines the experience and expertise of more than 7,000 employees who are driven by a passion for innovation, collaboration and impactful change. Using cutting-edge technologies, Axpo innovates to meet the evolving needs of its customers in over 30 countries across Europe, North America and Asia.
